

Air Flow & Whitening Packages

Package 1

Air Flow Clean

Airflow uses a mixture of air, modified sodium bicarbonate and 0.3% chlorhexidine combined with a water jet to remove tooth discolouration and microbial deposits. It is fast, painless and an excellent way to remove resistant stains or start tooth whitening. Very effective to clean around orthodontic braces.

£90.00

Package 2

Hygienist visit combined with Airflow Clean

Your hygienist will start your treatment with an intensive scale and polish using hand and ultrasonic scalers, followed by an airflow clean. This is the perfect treatment to maintain healthy teeth and gums or start tooth whitening. Very effective to remove stains and residual cement after orthodontic treatment.

£120.00

Package 3

Hygienist visit, Air Flow Clean, Illumine Professional Whitening Kit & Opalescence whitening toothpaste

After scaling, polishing and Airflow Clean you will be fitted with custom made trays (impressions needed) to start your home whitening. The Illumine kit contains 3 syringes of 15% carbamide peroxide. Opalescence toothpaste will help keep your new smile white and fresh. It may also be used as an every day toothpaste.

£350.00

Package 4

Zoom Whitening plus take home gel (impressions required)

This is an in chair whitening system consisting of about one hour of treatment. Once your in chair session is complete you will be provided with take home whitening. You have the choice of 2 gel systems, DayWhite 6% HP (worn twice a day for 30minutes) or NiteWhite 16% CP (worn overnight).

£499.00

Please note any combination of cleaning and whitening may be tailor-made to your need.

Please ask a member of staff for further advice.
